

Publishing agreement for electronic publication of a student thesis via LiU E-Press

Linköping University Electronic Press (LiU E-Press) offers all students (at undergraduate and advanced levels) at Linköping University the possibility to e-publish their student thesis (essay or academic paper) in DiVA, unless there are copyright or confidentiality reasons for not doing so. Collected data may also be published as a supplement to the student thesis. This Agreement between the Author, identified below (in relevant cases, the term Author can refer to a collective of authors) regulates the publication of the work identified below including any associated collected data (and henceforth referred to as the Student thesis). By signing the Agreement, the Author agrees to "Terms of publication when publishing electronically via LiU E-Press" ([Dnr: UB-2025-00041](#)) (henceforth referred to as Terms of publication).

The Author registers the relevant metadata (title, author, abstract, course etc) and uploads the Student thesis as a PDF to DiVA. [Instructions are available here](#). The examining department is responsible to make sure the metadata is correct and publish the Student thesis when this Agreement has been signed. If associated collected data should be published, the Author register the data in [Linköping University's student-community on Zenodo](#). Linköping University library will check its content and Metadata before publishing in Zenodo.

Title of Student thesis:	Activating Antagonism – Populism and Ego-Network Structure among German MPs on Twitter		
Degree Programme / Subject:	Master of Science, Computational Social Science		
Department:	Department of Management and Engineering (IEI)	ISRN (if applicable):	LIU-IEI-FIL-A-26/05238-SE

Copyright and License

The Author retains the copyright and elects to publish the Student thesis with the following **license** (select one). [More about licenses and how to select the proper license](#)

☒ **Creative Commons Attribution (CC BY)** (recommended, the most accommodating CC license). CC BY lets others read, distribute, adapt, and build upon the work, as long as they credit the Author for the original creation.

☐ **Creative Commons Attribution Non-Commercial (CC BY-NC)** CC BY-NC lets others read, adapt, and build upon the work non-commercially, as long as they credit the Author for the original creation.

☐ **No Creative Commons license** (If you do not select any option, this option will be chosen by default.)

With no explicit license, others will be able to read the work.

License for any collected data is selected in Zenodo (we recommend CC BY for data).

Liability

The responsibilities of LiU E-Press are stipulated in the [Terms of publication](#).

By signing the agreement, the Author:

- Accepts the Agreement and Terms of publication, including fulfilling accessibility requirements [Read more](#) (Swedish).
- Certifies that the chosen Creative Commons license (if applicable) is displayed on publication page in the Student thesis. [Read more](#).
- Assigns LiU E-Press the non-exclusive right to e-publish the Student thesis online via LiU E-Press with the Creative Commons license chosen by the Author (if applicable).

Author signature

If the Student thesis has multiple authors, all authors need to sign the Agreement. If the number of authors is more than two, the remaining authors sign on the back of this document.
